PLAN HIGHLIGHTS

Rock Island – Milan School District No. 41 403(b) Plan

Your employer-sponsored retirement plan is a powerful way to save for the future. Learn more about the benefits of your plan, and get the answers to any questions you have.

How can I contribute to my retirement plan?

You can control your contributions in the following ways:

- You can contribute up to 100% of your salary to your retirement savings, not to exceed the maximum allowed by the IRS.
- You can increase or decrease your contribution rate at any time.
- You can discontinue contributions to your retirement savings plan at any time. The effective date of the changes occurs as soon as administratively possible.
- You can enroll by logging in to LincolnFinancial.com/Retirement.

When am I fully vested in my retirement plan?

"Fully vested" means you have 100% ownership of the assets in your retirement account (your plan).

- You always have 100% ownership of any money you contribute to the plan, including any earnings and/or assets consolidated from another retirement plan.

What are my investment options?

You can choose from a wide variety of investment options to meet your retirement savings goal.

- **MAKE AN ALL-IN-ONE CHOICE** if you want one diversified portfolio managed for you.
- **MANAGE IT YOURSELF** and select your own portfolio of investments.
- **STILL UNDECIDED?** If you participate in the plan without selecting investment options, your money will be directed to the Default Investment Alternative (DIA) selected by your employer.

Can I consolidate accounts from my previous retirement plans?

You can consolidate assets from one or more previous retirement plans. When determining whether consolidation is right for you, consider:

- Investment options in the old and new plans
- Investment expense within the old and new plans
- Services available to you within the old and new plans

Contact your financial representative for assistance in determining the course of action appropriate to your situation.

WELCOME

Can I access balances in my retirement savings account prior to retirement?

Your retirement plan will have the greatest potential to grow if you stay invested for the long term, rather than withdrawing money from it. For that reason, the IRS limits what you can do with your account prior to retirement by imposing certain penalties for early distributions. However, you do have access to your savings—and may avoid penalties—under certain circumstances.

Withdrawals of pretax balances

You may take a distribution from **certain available accounts** upon:

- Severance from employment
- Attainment of age 59 ½
- Financial hardship
(Distribution may be subject to the premature 10% distribution penalty if taken prior to age 59 ½.)
- RMDs (Required Minimum Distributions)

Consult with your tax advisor before withdrawing any money from your account. You may wish to confirm with your plan sponsor the distributions available under your plan.

How can I access my account?

You can access and manage your retirement account any time:

These highlights are a brief overview of the Rock Island - Milan School District No. 41 403(b) Plan and not a legally binding document. Please read these materials carefully and contact your Human Resources department if you have further questions.

For any investment option in the plan, including an option that is part of an asset allocation portfolio, you may obtain a prospectus or a similar document by requesting one from your employer, visiting your plan's website, or calling a Lincoln Financial representative at 800-234-3500.

DECIDE HOW MUCH TO SAVE

Your contributions represent the main fuel that generates the growth of your savings. In 2026, the IRS allows you to contribute up to \$24,500 to your plan, \$32,500 if you're age 50 or older. (Amounts can vary by plan.) The more you save, the greater the potential accumulation over time. The earlier you start can make a big difference, too.

The advantage of starting one year earlier

"Don't put off until tomorrow what you can do today" is great advice, but it's really great advice for retirement savers. Here's a look at what one year of extra saving at \$200 a month can do for you in 20, 30, and 40 years' time.

This is a hypothetical illustration and is not indicative of any product or performance; it does not reflect any taxes due upon distribution or any fees associated with investing. Investment options are subject to market risk. It assumes \$200 monthly contributions, 6% annual return, and retirement at age 65.

Keep in mind that boosting your pretax contribution has less impact on take-home pay than you may think because the amount you contribute lowers your taxable income for the year.

DECIDE HOW MUCH TO SAVE

Every little bit counts

Even a small increase in your workplace retirement plan deferral rate can make a big difference in the size of your savings. Say you're 30 years old, earn an annual salary of \$52,000, and get paid biweekly. Deferring 2% of your salary to your plan may reduce your take-home pay by \$28, but by age 65 you could potentially accumulate more than \$174,000 in retirement savings. Defer another 2% and you could gain another \$174,000. The chart below shows the impact saving 2% more can make.

Savings-rate assumptions include 3% annual raises and 6% annual investment returns, calculated using the "Retirement Contribution Effects on Your Paycheck" tool at [bankrate.com](https://www.bankrate.com).

As a rule of thumb, try to put **10% – 15% of your income toward your retirement**. It's an easy-to-remember target, and the sooner you start to save, the likelier you may be to reach your financial goals. Check your progress by using the Contribution Planner at LincolnFinancial.com/ContributionPlanner.

Important investment information

Performance

When used as supplemental sales literature, investment information must be accompanied by this disclosure statement

The performance data quoted represents past performance; past performance does not guarantee future results. Investment returns and principal value will fluctuate so your account balance, when redeemed, may be worth more or less than your original cost.

Current performance may be lower or higher than the performance data quoted. Instances of high double-digit returns are highly unusual and cannot be sustained. Investors should be aware that returns vary due to market conditions.

Participation in a collective trust (designated as "Trust" in the name of the investment option) is governed by terms of the trust and participation materials. An investor should carefully consider the investment objectives, risks, and charges and expenses of the collective trusts before investing. The participation materials contain this and other important information and should be read carefully before investing or sending money. Participation materials for any of the collective trusts in the program are available at 877-533-9710.

You may obtain a prospectus or similar document for each investment option in the plan by requesting one from your employer, visiting your plan's website, or calling a Lincoln Financial representative at 800 234-3500.

When the fund's inception date is less than 10 years, historical performance may not be available. When this is the case, extended performance has been calculated based on the oldest share class of the fund, adjusted for fees.

Please obtain mutual fund performance data for the most recent month end by visiting www.morningstar.com and requesting a quote using the appropriate ticker symbol.

Fund data is provided here by Morningstar, Inc.

Issuing Company

The Lincoln Stable Value Account is a fixed annuity contract issued by The Lincoln National Life Insurance Company, Fort Wayne, IN 46802 on Form 28866-SV 01/01, 28866-SV20 05/04, 28866-SV90 05/04, AN 700 01/12, or AR 700 10/09. **Guarantees for the Lincoln Stable Value Account are subject to the claims-paying ability of the issuer.**

Fees and Expenses

Fees and expenses reduce the assets allocated to your investments under the Plan, ultimately lowering the net rate of return. In addition, the fees and expenses of the investment options in your Plan will negatively impact the net rate of return of those investments. Higher fees, of course, will impact the performance of your investments.

If the performance for an investment option reports a difference between the gross expense ratio and net expense ratio, please refer to the fund's prospectus (mutual funds) or disclosure statement (collective investment trust), which may provide an explanation of applicable fee waivers.

Fee and expense information is based on information available as of 03/31/2026.

Benchmarks

A benchmark index gives the investor a point of reference for evaluating a fund's performance. Each investment option in the Plan's lineup is compared with a secondary index, based on its Morningstar Category. For example, all funds in the large-growth category are compared with the Russell Top 200 Growth index.

Investment Risk

Foreign securities portfolios/emerging markets portfolios: Portfolios that invest in foreign securities involve special additional risks. These risks include, but are not limited to: currency risk, political risk, and risk associated with varying accounting standards. Investing in emerging markets can accentuate these risks.

Sector portfolios: Portfolios that invest exclusively in one sector or industry involve additional risks. The lack of industry diversification subjects the investor to increased industry-specific risks.

Nondiversified portfolios: Portfolios that invest assets in a single issuer or a few issuers involve additional risks, including share price fluctuations, because of the increased concentration of investment.

Small-cap portfolios: Portfolios that invest in stocks of small companies involve additional risks. Smaller companies typically have a higher risk of failure and are not as well established as larger blue-chip companies. Historically, smaller-company stocks have experienced a greater degree of market volatility than the overall market average and may be less liquid than larger companies.

Mid-cap portfolios: Portfolios that invest in companies with market capitalization below \$10 billion involve additional risks. The securities of these companies may be more volatile and less liquid than the securities of larger companies.

High-yield bond portfolios: Portfolios that invest in less-than-investment-grade-rated debt securities (commonly referred to as junk bonds) involve additional risks because of the lower credit quality of the securities in the portfolio. The investor should be aware of the possible higher level of volatility and increased risk of default.

REITs: The value of the shares of a REIT fund will fluctuate with the value of the underlying assets (real estate properties). There are special risk factors associated with REITs, such as interest rate risk and the illiquidity of the real estate market.

Fund Restrictions

Lincoln Stable Value Account -Z279: Transfers from this investment option to competing funds may be restricted. Transfers may be made to noncompeting funds if there are no subsequent transfers to competing funds within 90 days.

Frequent trading policy: Transactions associated with market timing — such as frequent, large, or short-term transfers among investment options — can affect the underlying funds and their investments. Lincoln Financial therefore reviews the number of transfers that a participant makes within given periods of time to determine if any transfer attempts to capitalize upon short-term movements in the equity markets (Market Timing Policy). If so, the participant's transfer activity will be subject to further scrutiny. Potential market timing or frequent trading may result in future trading restrictions, up to and including temporary (or permanent) revocation of telephone exchange privileges.

Fund-specific restrictions: Fund companies may have their own policies and procedures with respect to frequent purchases and redemptions of their respective shares, which may be more or less restrictive than the frequent trading policies and procedures of other investment options and of the Lincoln Financial Market Timing Policy. For example, when funds adopt a purchase blocking policy and you transfer an amount in excess of the fund's imposed limit from that investment, you will be restricted from investing back into that investment for a specified period of time. For more information on frequent purchase and redemption policies, please refer to the fund's prospectus or similar document.

Target-risk Disclosures

- 1 Funds that invest in small and/or mid-size company stocks typically involve greater risk, particularly in the short term, than those investing in larger, more established companies.
- 2 Investing internationally involves risks not associated with investing solely in the United States, such as currency fluctuation, political risk, differences in accounting and the limited availability of information.
- 3 The return of principal in bond portfolios is not guaranteed. Bond Portfolios have the same interest rate, inflation, credit, prepayment and market risks that are associated with the underlying bonds owned by the fund (or account).
- 4 Investing in emerging markets can be riskier than investing in well-established foreign markets. International investing involves special risks not found in domestic investing, including increased political, social and economic instability.
- 5 An index is unmanaged, and one cannot invest directly in an index.
- 6 Social Awareness funds only invest in companies that meet socially responsible criteria, so exposure to certain industry sectors may be greater or less than similar funds or market indexes, and thereby may lead to performance differences.
- 7 The Lincoln Stable Value Account is a fixed annuity contract issued by The Lincoln National Life Insurance Company, Fort Wayne, IN 46802 on Form 28866-SV 01/01, 28866-SV20 05/04, 28866-SV90 05/04, AN 700 01/12, or AR 700 10/09.
Guarantees for the Lincoln Stable Value Account are subject to the claims-paying ability of the issuer.

Investment risks

The following information reflects a complete listing of current investment risk disclosures. For more information on investment risks, log in to your account at LincolnFinancial.com/Retirement.

International

Investing internationally involves risks not associated with investing solely in the United States, such as currency fluctuation, political or regulatory risk, currency exchange rate changes, differences in accounting, and the limited availability of information.

Small & mid cap

Funds that invest in small and/or midsize company stocks may be more volatile and involve greater risk, particularly in the short term, than those investing in larger, more established companies.

Money market funds

You can lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share (or, for the LVIP Government Money Market Fund, at \$10.00 per share), it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

Index

An index is unmanaged, and one cannot invest directly in an index. Indexes do not reflect the deduction of any fees.

Sector funds

Funds that target exposure to one region or industry may carry greater risk and higher volatility than more broadly diversified funds.

Bonds

The return of principal in bond funds is not guaranteed. Bond funds have the same interest rate, inflation, credit, duration, prepayment and market risks that are associated with the underlying bonds owned by the fund or account.

Asset allocation

Asset allocation does not ensure a profit or protect against loss in a declining market.

High-yield or mortgage-backed funds

High-yield funds may invest in high-yield or lower rated fixed income securities (junk bonds) or mortgage-backed securities with exposure to subprime mortgages, which may experience higher volatility and increased risk of nonpayment or default.

REIT

A real estate investment trust (REIT) involves risks such as refinancing, economic conditions in the real estate industry, declines in property values, dependency on real estate management, changes in property taxes, changes in interest rates and other risks associated with a portfolio that concentrates its investments in one sector or geographic region.

Emerging markets

Investing in emerging markets can be riskier than investing in well-established foreign markets. International investing involves special risks not found in domestic investing, including increased political, social and economic instability, all of which are magnified in emerging markets.

Fund of funds

Each fund is operated as a fund of funds that invests primarily in one or more other funds, rather than in individual securities. A fund of this nature may be more expensive than other investment options because it has additional levels of expenses. From time to time, the fund's advisor may modify the asset allocation to the underlying funds and may add new funds. A fund's actual allocation may vary from the target strategic allocation at any point in time. Additionally, the fund's advisor may directly manage assets of the underlying funds for a variety of purposes.

S&P

The Index to which this fund is managed to is a product of S&P Dow Jones Indices LLC (SPDJI) and has been licensed for use by one or more of the portfolio's service providers (licensee). Standard & Poor's® and S&P® are registered trademarks of Standard & Poor's Financial Services LLC (S&P); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC (Dow Jones); and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by the licensee. S&P®, S&P GSCI® and the Index are trademarks of S&P and have been licensed for use by SPDJI and its affiliates and sublicensed for certain purposes by the licensee. The Index is not owned, endorsed, or approved by or associated with any additional third party. The licensee's products are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, their respective affiliates, or their third party licensors, and none of these parties or their respective affiliates or third party licensors make any representation regarding the advisability of investing in such products, nor do they have liability for any errors, omissions, or interruptions of the Index®.

Feeder funds

This fund operates under a master-feeder structure. The fund invests all its assets in a separate mutual fund (the master fund) that, in turn, purchases investment securities. Funds of this nature may be more expensive than other investment options. Performance, if shown, is from the inception date of each master fund that was purchased by the applicable LVIP American Fund (i.e., the feeder fund in the master-feeder fund structure). Performance information shown is that of each master fund, as adjusted for the feeder fund expenses, including the fees and expenses of the Service Class II shares and product fees. The performance information shown is not the feeder fund's own performance, and it should not be considered as indicative of past or future performance or as a substitute for the fund's performance.

Multimanager

For those funds that employ a multimanager structure, the fund's advisor is responsible for overseeing the subadvisors. While the investment styles employed by the fund's subadvisors are intended to be complementary, they may not, in fact, be complementary. A multimanager approach may result in more exposure to certain types of securities risks and in higher portfolio turnover.

Commodities

Exposure to the commodities markets may subject the fund to greater volatility than investments in traditional securities, particularly if the investments involve leverage. This fund will typically seek to gain exposure to the commodities markets by investing in commodity-linked derivative instruments, swap transactions, or index- and commodity-linked "structured" notes. These instruments may subject the fund to greater volatility than investments in traditional securities. A commodities fund may be non-diversified, which means it may incur greater risk by concentrating its assets in a smaller number of issuers than a diversified fund.

Ultrashort bond funds

During periods of extremely low short-term interest rates, the fund may not be able to maintain a positive yield and, given a historically low interest rate environment, may experience risks associated with rising rates.

Collective trusts

Collective trusts are non-deposit investment products, which are not bank deposits or obligations, are not guaranteed by any bank, and are not insured or guaranteed by the FDIC, the Federal Reserve Board, or any other government agency.

Exchange-traded funds

Exchange-traded funds (ETFs) in this lineup are available through collective trusts or mutual funds. Investors cannot invest directly in an ETF.

Target-date funds

The target date is the approximate date when investors plan to retire or start withdrawing their money. Some target-date funds make no changes in asset allocation after the target date is reached; other target-date funds continue to make asset allocation changes following the target date. (See the prospectus for the fund's allocation strategy.) The principal value is not guaranteed at any time, including at the target date. An asset allocation strategy does not guarantee performance or protect against investment losses. A "fund of funds" may be more expensive than other types of investment options because it has additional levels of expenses.

MSCI

The fund described herein is indexed to an MSCI® index. It is not sponsored, endorsed, or promoted by MSCI®, and MSCI® bears no liability with respect to any such fund or to an index on which a fund is based. The prospectus and statement of additional information contain a more detailed description of the limited relationship MSCI® has with Lincoln Investment Advisors Corporation and any related funds.

Floating rate funds

Floating rate funds should not be considered alternatives to CDs or money market funds and should not be considered as cash alternatives.

Macquarie Investment Management

Investments in Delaware VIP Series, Delaware Funds, LVIP Delaware Funds or Lincoln Life accounts managed by Macquarie Investment Management Advisers, a series of Macquarie Investments Management Business Trust, are not and will not be deposits with or liabilities of Macquarie Bank Limited ABN 46008 583 542 and its holding companies, including their subsidiaries or related companies, and are subject to investment risk, including possible delays in prepayment and loss of income and capital invested. No Macquarie Group company guarantees or will guarantee the performance of the series or funds or accounts, the repayment of capital from the series or funds or account, or any particular rate of return.

Risk management strategy

The fund's risk management strategy is not a guarantee, and the fund's shareholders may experience losses. The fund employs hedging strategies designed to provide downside protection during sharp downward movements in equity markets. The use of these hedging strategies may limit the upside participation of the fund in rising equity markets relative to other unhedged funds, and the effectiveness of such strategies may be impacted during periods of rapid or extreme market events.

Managed volatility strategy

The fund's managed volatility strategy is not a guarantee, and the fund's shareholders may experience losses. The fund employs hedging strategies designed to reduce overall portfolio volatility. The use of these hedging strategies may limit the upside participation of the fund in rising equity markets relative to unhedged funds, and the effectiveness of such strategies may be impacted during periods of rapid or extreme market events.

Alternative funds

Certain funds (sometimes called "alternative funds") expect to invest in (or may invest in some) positions that emphasize alternative investment strategies and/or nontraditional asset classes and, as a result, are subject to the risk factors of those asset classes and/or investment strategies. Some of those risks may include general economic risk, geopolitical risk, commodity-price volatility, counterparty and settlement risk, currency risk, derivatives risk, emerging markets risk, foreign securities risk, high-yield bond exposure, index investing risk, exchange-traded notes risk, industry concentration risk, leveraging risk, real estate investment risk, master limited partnership risk, master limited partnership tax risk, energy infrastructure companies risk, sector risk, short sale risk, direct investment risk, hard assets sector risk, active trading and "overlay" risks, event-driven investing risk, global macro strategies risk, temporary defensive positions and large cash positions. If you are considering investing in alternative investment funds, you should ensure that you understand the complex investment strategies sometimes employed and be prepared to tolerate the risks of such asset classes. For a complete list of risks, as well as a discussion of risk and investment strategies, please refer to the fund's prospectus. The fund may invest in derivatives, including futures, options, forwards and swaps. Investments in derivatives may cause the fund's losses to be greater than if it invested only in conventional securities and can cause the fund to be more volatile. Derivatives involve risks different from, or possibly greater than, the risks associated with other investments. The fund's use of derivatives may cause the fund's

investment returns to be impacted by the performance of securities the fund does not own and may result in the fund's total investment exposure exceeding the value of its portfolio.

Dow Jones is a registered trademark of Dow Jones Trademark Holdings LLC (Dow Jones). The trademark has been licensed to S&P Dow Jones Indices LLC and has been sublicensed for use for certain purposes by First Trust Advisors L.P. The product is not sponsored, endorsed, sold or promoted by Standard & Poor's, and Standard & Poor's makes no representation regarding the advisability of purchasing the product.

S&P EWI

Equally-Weighted S&P 500 Fund. The fund is not sponsored, endorsed, sold or promoted by S&P, and S&P makes no representation regarding the advisability of investing in the fund.

Manager of managers funds

Subject to approval of the fund's board, Lincoln Investment Advisors Corporation (LIAC) has the right to engage or terminate a subadvisor at any time, without a shareholder vote, based on an exemptive order from the Securities and Exchange Commission. LIAC is responsible for overseeing all subadvisors for funds relying on this exemptive order.

Private equity

The fund is subject to certain underlying risks that affect the listed private equity companies in which the fund invests. These underlying risks may include, but are not limited to, additional liquidity risk, industry risk, non-U.S. security risk, currency risk, valuation risk, credit risk, managed portfolio risk and derivatives risk. There are inherent risks in investing in private equity companies, as little public information generally exists for private and thinly traded companies, and there is a risk that investors may not be able to make fully informed investment decisions. Listed private equity companies may have relatively concentrated portfolios, which may lead to more volatility. Certain fund investments may be exposed to liquidity risk due to low trading volume, lack of a market maker or legal restrictions limiting the availability of the fund to sell particular securities at any given price and/or time. As a result, these securities may be more difficult to value.

YourPath®

The target date is the approximate date when investors plan to retire or start withdrawing their money. These target-date collective investment trusts may continue to make asset allocation changes following the target date. (See the fact sheets for the allocation strategy.) The principal value is not guaranteed at any time, including at the target date. A group annuity contract issued by The Lincoln National Life Insurance Company provides the stable value option in the collective trust. An asset allocation strategy does not guarantee performance or protect against investment losses. A target date collective trust may be more expensive than other types of investment options because it has additional levels of expenses. Collective trusts are non-deposit investment products, which are not bank deposits or obligations, are not guaranteed by any bank, and are not insured or guaranteed by the FDIC, the Federal Reserve Board or any other government agency.

- Use this form to request a Contract Exchange of your 403(b) annuity or custodial account assets to the 403(b)(7) custodial account in the *Lincoln Alliance*® program. Throughout this form, the term "transfer" is used to describe the tax-free total or partial exchange of one account for another based on the final 403(b) regulations published on July 26, 2007.
- Transfers from a Lincoln Financial Group (Lincoln)¹ annuity contract to the investment options offered through the *Lincoln Alliance*® program are liquidated on the date of receipt at Lincoln. Once Lincoln prices a redemption request, it may take an additional 3-5 business days to apply the investment options you have selected. During this process, your assets will not be subject to market gains or losses until the transfer is complete. You will receive a confirmation notice when your transfer has been processed out of your annuity contract and again when it has been processed into the fund selection offered through the *Lincoln Alliance*® program.
- Circumstances such as incomplete forms, trading deadlines or unusually high volumes may result in additional time to process your transfer.
- For questions regarding transfers from non-Lincoln contracts, contact your previous provider.

Determining the type of investor you are may help you create an asset allocation strategy that's right for you. This quiz was designed to help you estimate your investment risk tolerance based on your ability and willingness to assume certain investment risks.

Circle your answers. Then add up your score to find out what type of investor you may be. Consider examining your asset allocation once a year to see if it still fits your personal situation.

Mutual funds and variable annuities are sold by prospectus. Investors are advised to consider carefully the investment objectives, risks, and charges and expenses of a mutual fund, and in the case of a variable annuity, the variable contract and its underlying investment options. To obtain a mutual fund or variable annuity prospectus that contains this and other information, call 800-4LINCOLN. Carefully read the prospectus before investing or sending money.

Variable annuities are long-term investment products designed particularly for retirement purposes and are subject to market fluctuation, investment risk, and possible loss of principal. Variable annuities contain both investment and insurance components and have fees and charges, including mortality and expense, administrative, and advisory fees. Optional features are available for an additional charge. The annuity's value fluctuates with the market value of the underlying investment options, and all assets accumulate tax-deferred. Withdrawals of earnings are taxable as ordinary income and, if taken prior to age 59½, may be subject to a 10% federal tax. Withdrawals will reduce the death benefit and cash surrender value. There is no additional tax-deferral benefit for an annuity contract purchased in an IRA or other tax-qualified plan.
